Your Job

What you give your best for.

/ Shaping the future of our frontend applications and AEM platform as a developer in the Global Agile team
/ Continuously extending the AEM platform to create new digital customer experiences as part of an agile scrum team
/ Aligning with stakeholders from other teams in our regular agile ceremonies as part of assuming a core role in the agile team
/ Providing support with the planning, estimation and implementation of new requirements and driving the continuous development of AEM
/ Using your expertise to drive technical decision making and evaluate future developments
/ Taking part in technical discussions and providing constructive feedback as part of code reviews
/ Actively contributing ideas and suggestions to continuously expand our CMS platform in a modern, scalable and performant way

Your Profile

What you should have.

/ A passion for writing clean code and bringing best practices to the team
/ You are an Adobe Experience Manager (AEM) with a strong background in using Java
/ Extensive web content and asset management experience with AEM, knowledge of various microservices, and experience with both standard and custom building blocks
/ Solid knowledge of Apache Oak (JCR), Sling and Felix
/ Strong agile mindset and you are a proactive hand raiser
/ You communicate fluently and effectively in English – fitting into our international team
/ Naturally curious and eager to continuously grow and learn

Desirable extras.

/ Knowledge of containerisation, modern front-end tools, CI/CD
/ Experience in e-commerce and product development
