Your Job

What you give your best for.
/ Lead the development, testing, and operation of a data transformation application utilizing SAP Cloud Application Programming (CAP) and Azure Cosmos DB within a global middleware product
/ Collaborate closely with the cell architect to enhance architecture, ensuring optimal performance and reliability
/ Ensure adherence to technical standards and operational requirements
/ Actively participate in an agile, self-organized team environment
Your Profile

What you should have.
/ University degree in Information Technology or in a related field
/ Proficiency in JavaScript, Node.js, and Gitlab
/ Demonstrated experience in Data Transformation development, particularly in SAP CAP with HANA Cloud DB and beneficially in Azure Cosmos DB
/ Familiarity with core data services (CDS) for setting up OData services in SAP CAP
/ Deep understanding of database design principles and operations
/ Profound knowledge in Jira and Confluence
/ Proficiency in DB Explorer and SQL query for troubleshooting
/ Strong analytical and problem-solving skills
/ Excellent communication skills and persuasiveness
/ Fluency in English (C-level)

Desirable extras.
/ Experience with DevOps and CI/CD automation
/ Proficiency in writing and implementing automated tests
/ Knowledge of DB monitoring tools for HANA Cloud DB, Node.js and Cosmos DB
/ Understanding of background jobs and procedures
/ Experience in upgrading SAP CAP and Node.js versions
/ Exposure to complex IT architecture in a global setting
/ Agile methodology skills
